New Entertainment for the Bathroom by Wet

Images: Wet

The Italian company Wet introduced their new X-Light Surround basin and shown the world that washing can be a really enjoyable activity. Jan Puylaert designed the washbasin as the first true "musical" washbasin. It comes with a built-in amplified speaker system for your iPod. All you need is to plug in your MP3 player into this amplified sink and your bathroom will transform into a high level concert-hall, with superb sound quality.

ShareThis

The crystal-clear transparent (scratch-resistant) PMMA material visually reveals the powerful 2-way 165mm waterproof high-fidelity speakers capable of handling over 2x60 watt over a frequency-range of 65-20.000Hz! Two directional tweeters, with reversed aluminium dome membrane, assure a crispy high frequency, when braised glass fibber cone equipped impressive woofers produce a full and smooth bass. And because both speakers are mounted facing the floor, their natural sound will spread into a more than just stereo wideness. In fact, X-Light Surround has been specifically studied to "reflect" its sound around the typical flat and hard surfaces of bathrooms in order to achieve a magical all round acoustic experience. Dimensions: 142 x 38 cm
